Good idea.

Looks fine to me. If you think the general public will be looking at this you can add where it will be available for public comment and/or that it will be posted/linked on our site.

Subject: update to Pavillion web site

It has been pointed out that the Pavillion website could use some sort of brief update describing the status of this summer's sampling activity.

Please offer any suggested changes to what we have drafted below....Thanks!

What's New

June: Update on 2012 sampling activity

EPA, in cooperation with the U.S. Geological Survey and the State of Wyoming, is re-sampling two monitoring wells the Agency installed in the Pavillion area in the summer of 2010. EPA is also collecting samples from four private and one public water supply well. Sample results, which are expected later this summer, will be made available for public comment and the peer review process.
